

Heart Attack Symptoms in Men and Women

Despite what you've seen in movies, people having a heart attack do not all experience excruciating chest pain that makes them fall to the ground. In fact, women are more likely to have much subtler, atypical symptoms during a heart attack. While chest pain is the most common sign for both men and women, here are some differences that can occur. No matter your symptoms, if you think you're having a heart attack, dial 911. Every second counts for receiving lifesaving care.
